DETAILED ACTION

This is the second office action for U.S. Application 10/792,058 for a Grip Tip filed on March 3, 2004.

Election/Restrictions

Claims 18-21 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on January 18, 2006.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 5 and 6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 5 recites the limitation "the rubber sheet" in lines 1 and 2 of the claim. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 3632

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 5, and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent 5,004,635 to Griebing. Griebing discloses a method for creating a gripping tip comprising the steps of: creating a rectangular sheet of elastic material (1) having a length, a width, and a thickness, with both the length and the width significantly greater than the thickness and the length longer than the width; rolling the sheet along the length to create a spiral plug having a length approximately equal to the width of the sheet; and affixing the spiral plug to an environmental contact point on a device (19). Tension is inherently applied to the elastic sheet as it is rolled upon the device.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2, 12, and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Griebing. Griebing does not disclose the specific width, length, and thickness of the sheet. However, the specific dimensions would have been modified as needed as a matter of engineering preference that would have been obvious to one of ordinary skill in the art at the time of the present

Art Unit: 3632

invention. Griebeling also fails to specifically disclose the sheet as being made of rubber or polyurethane. However, the sheet is disclosed as being made of foam elastomer and also discloses rubber as a known material for the sheet in the prior art (see cols. 1 and 2). It would have been obvious to one of ordinary skill in the art at the time of the present invention to have utilized an equivalent material such as rubber or polyurethane for the sheet taught by Griebeling as a matter of engineering preference.

Allowable Subject Matter

Claims 3, 4, 7-11, and 14-17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following references were not relied upon, but are considered pertinent.
